SUMMARY

Final-year B.Tech IT student with hands-on experience in MERN development and AI/LLM systems, including multi-agent platforms using LangGraph. Strong DSA foundation with 450+ problems solved and experience building scalable, real-world projects.

EDUCATION

Parul University

B.Tech in Information Technology — CGPA: 8.44/10

Vadodara, Gujarat

2023 – 2027 (Expected)

EXPERIENCE

Artificial Intelligence Intern

Aug 2025 – Oct 2025

EdiGlobe

- Contributed across the software development lifecycle on AI-based applications, scoping requirements with the team before starting implementation.

PROJECTS

CortexAI – Multi-Agent AI Platform | [GitHub](#) | React.js, Node.js, LangGraph, MongoDB, Redis, Docker 2026

- Built a full-stack multi-agent AI platform that intelligently routes user requests across specialized agents for chat, coding, web search, document processing, and image generation.
- Designed a modular Node.js/Express microservice architecture with dedicated authentication, agent, and chat services connected through REST APIs.
- Implemented LangGraph-based agent orchestration with LLM APIs to manage task routing, agent coordination, and context-aware response generation.

EduX – Smart Faculty & Timetable Planner | [Live](#) | React.js, Node.js, MongoDB

2025

- Built a full-stack MERN application for automated faculty and timetable management, reducing scheduling conflicts through constraint-based timetable generation.
- Implemented role-based access control for Admin, Faculty, and Student users with secure JWT-based authentication and protected APIs.
- Designed REST APIs using Node.js and Express.js for faculty, subjects, classrooms, divisions, leaves, and timetable management with validation and error handling.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML, CSS

Backend & API: Node.js, Express.js, REST API Design, JWT Authentication

AI/LLM: LangChain, LangGraph, RAG, LLM APIs, Machine Learning, Scikit-Learn

Databases: MongoDB, MySQL, Mongoose

Tools & Platforms: Git, GitHub, Docker, Postman, Linux (basic)

Programming: JavaScript, Python, C++, SQL

CERTIFICATIONS

Machine Learning (NPTEL) — Elite + Top 5% (71%), 2025

[Verify](#)

Computer Networks & Internet Protocol (NPTEL) — Elite (61%), 2025

[Verify](#)

ACHIEVEMENTS & CODING PROFILES

Hackathons: contributed to ISRO Bharatiya Antariksh Hackathon (BAH) 2026 on lunar subsurface ice detection using Chandrayaan-2 OHRC/DFSAR data [Verify](#).

LeetCode: 350+ Problems

[Verify](#)

GeeksforGeeks: 150+ Problems

[Verify](#)

Google Cloud Arcade: Arcade Legend tier, 95+ pts, Season 2 (Aug–Dec 2025)

[Verify](#)

— Generative AI, Document AI, Kubernetes, BigQuery, Terraform; Arcade Trooper tier, 40+ pts, Season 1 (Jan–Jun 2025)

[Verify](#)
